CAREER OBJECTIVE

BCA student and full-stack developer skilled in React, Node.js, MongoDB, Redis, LangChain, and Socket.io, with growing experience in RAG-based AI systems. Eager to leverage my technical skills in a Web Development internship to build scalable web applications, solve real-world problems, and contribute to a fast-paced professional team.

PROJECTS

NeuraChat – Real-Time AI Chatbot

Aug. 2026

▪ [Live Demo](#) ▪ [GitHub Repo](#)

- Built a real-time AI chatbot with a React and Tailwind CSS frontend, powered by an Express, MongoDB, and LangChain backend
- Integrated Mistral LLM with the Tavily API to fetch live, real-time information and generate accurate, context-aware responses
- Implemented response streaming and persistent chat history using Socket.io, along with secure user authentication and email verification

ShopCart – E-Commerce Web Application

June 2026

▪ [Live Demo](#) ▪ [GitHub Repo](#)

- Designed and built a fully responsive e-commerce storefront using React.js and Tailwind CSS, focused on a clean and intuitive shopping experience
- Integrated an external REST API to dynamically fetch and render 100+ product listings with fast load times and smooth pagination
- Implemented interactive UI components – filters, product cards, and hover states – to boost browsing engagement and product visibility

StreamTube – Video Sharing Platform

Apr. 2026

▪ [Live Demo](#) ▪ [GitHub Repo](#)

- Built a full-stack, YouTube-inspired video streaming platform with secure user authentication, video uploads, and a smooth, interactive UI
- Engineered a reliable media pipeline using Multer and ImageKit for fast video and thumbnail uploads, with metadata stored efficiently in MongoDB
- Crafted a responsive React and Tailwind CSS frontend delivering seamless video playback and a consistent experience across devices

EDUCATION

Indra Gandhi National Open University

2026 – Pursuing

Bachelor of Computer Applications (BCA)

TRAINING

Sheryians Coding School

2025 – Present

Web Application Development

SKILLS

Frontend : HTML, CSS, JavaScript, React.js, Redux, Tailwind CSS

Backend : Node.js, Express.js, RESTful APIs, LangChain, Socket.io

Databases : MongoDB, Mongoose, Redis

Tools : Git, GitHub, Postman, Version Control
